

Sahara Gas LTD UK

Sahara Gas is a diversified and independent shipping group serving the international gas and oil industry. Apart from providing the ships for the transportation of these products, it also performs studies and undertakes the management of commercial, technical and administrative activities for the industry.

Sahara Gas strives to create shareholder value over the long term by balancing long and short-term agreements to counteract volatility in the freight market, combined with providing services that are tailored to the needs of the customer.

Sahara Gas endeavours to support sustainable growth by attaching the greatest importance to the quality of its fleet, the safety of personnel and equipment and the protection of the environment.

Sahara Gas LPG/NH3/PETCHEMS

The main activity within the Sahara Gas LPG sector is the ownership and operation of a fleet of modern gas carriers. Sahara Gas transports liquefied gases, such as butane, propane, anhydrous ammonia and petrochemicals.

Sahara Gas is mainly active in the Midsize segment of the gas market with vessels from 22,000 - 40,000 m³ owned or under commercial management.

In addition, Sahara Gas's ownership portfolio includes very large gas carriers (VLGC), semi-refrigerated vessels and pressurised vessels.

Through in-house technical and crewing management, Sahara Gas continually seeks ways to improve and increase service to the gas industry.

A continuous new building programme is in place.

In addition, Sahara Gas entered into a joint venture with to order a total of 10 pressurised LPG carriers for delivery between November 2008 and September 2009.

Sahara Gas has over 20 years of experience in the transportation of LNG since the long-term time charter of the 131,000 m³ METHANIA was concluded with At the end of the 1990's a foreseen increase in demand for LNG together with attractive new building prices enabled Sahara Gas to make a major expansion in this area.

In 2006 from the existing platform Sahara Gas set up a new department developing projects aimed at expanding the scope of activities along the LNG value chain both up & downstream with a view of becoming an integrated service provider.

Today the Sahara Gas LNG sector is subdivided in two main activities:

ACTIVITIES
